

The Honorable Governor Jay Inslee
Office of the Governor
PO Box 40002
Olympia WA 98504-0002

March 2019

Governor Inslee,

We congratulate you on your candidacy for President of the United States in 2020. Your decision to run on a platform of combatting climate change is exciting to us. In your announcement speech you stated that we need to achieve clean, renewable, carbon free energy and achieve net zero greenhouse gas pollution. You also committed to end giveaways and subsidies to the fossil fuel industry.

While these are commendable goals and ambitions, there is work left to be done here in Washington state. The onslaught of fracked gas projects proposed here in Washington and in particular the Tacoma LNG project and the proposed Kalama methanol refinery are of particular concern to us. We believe that if these projects are allowed to go through to completion then Washington state will be locked into decades of fracked gas with its associated greenhouse gas emissions. Do you want your name to be associated with these projects? You can be a true climate champion and hero by publicly taking a stand against new fracked gas projects and infrastructure here in Washington.

We wholeheartedly agree that we need to ensure clean air and clear water for generations to come. We need clean, renewable and American made green energy sources.

With that said, if you want our support for your candidacy for President in 2020 then we need your support in defeating these fracked gas projects. We need for you to publicly oppose the Kalama methanol refinery and the Tacoma LNG project. We sincerely hope you will join us in combatting these dirty, fossil fuel projects.

Sincerely,

NoMethanol360.com
